Colour Guide

Jon Renau

HD Colours

Jon Renau make a range of Heat Defiant Synthetic wigs and hairpieces. These colours in a traditional synthetic will look different as the fibre reflects light differently.

Heat Defiant Synthetics are a synthetic fibre that can tolerate heat at low levels. You can use a hair straightener, curler or hair dryer up to temperatures of 170 Degrees Celsius. Below are is a chart of the most popular HD colours represented in actual wigs. Different wig styles may vary in colour.

Raquel Welch

Synthetic Colours

Tru 2 Life Synthetic fibres look and feel like real hair. They are heat friendly so you can style your wig with low heat. Straight styles can be curled while curly styles can be straightened. The texture is light and lustrous while giving you the most versatility being a heat friendly synthetic. Below are some of the most loved colours in a wig to give you a better idea for what your wig will look like.
